

CAS Centennial Fund Raiser

The Cincinnati Astronomical Society is approaching a milestone! In 2011 CAS will mark 100 years of celebrating amateur astronomy in the Greater Cincinnati area.

Our centennial also marks a long tradition of sharing the wonders of the night sky with the general public, students, teachers and scouts of all ages. To continue that service and tradition, I am asking for your support of what we call our CAS 100 Project.

I am asking for a contribution of \$100 or more from our members and the general public to celebrate our past and help secure the Society's future. The purpose of this effort is three fold:

- 50 % will be invested to help provide CAS with long term financial security.
- 25 % to purchase equipment and materials to support our expanding public outreach activities.
- 25 % will be added to our annual operations.

Our goal is to raise over \$10,000 through the generous contributions of \$100 from our members and the general public. We are asking you to be one of the Centennial Contributors of \$100.

As a 501(c)(3) all your contributions are tax deductible. If you can contribute more it will be greatly appreciated. Be assured that donations of any amount will help CAS meet its goal. Please complete and return this form with your contribution.

All contributors will be acknowledged in CAS's Sidereal Messenger newsletter. Donors of \$100 or more will be recognized on a Centennial plaque to be installed in the headquarters.

Thank you for your considerations and we hope to see you at future CAS events.

Terry Endres
CAS President
